# Overview

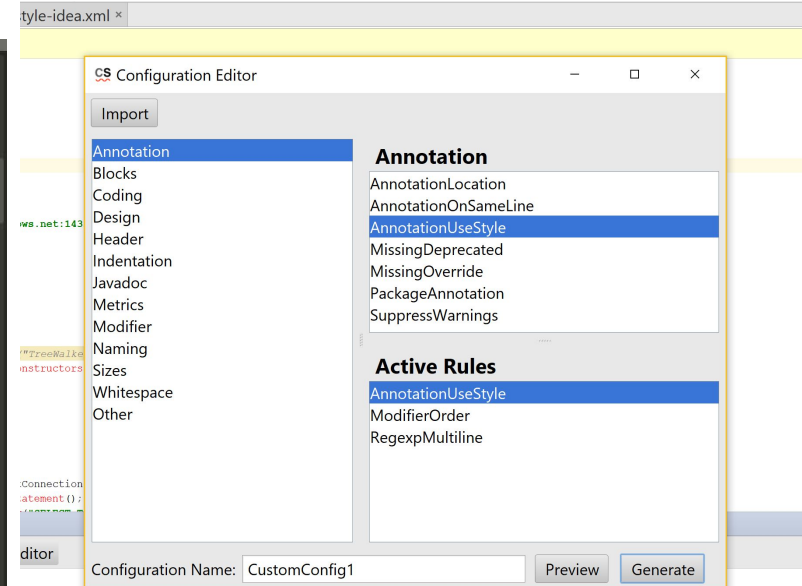

- Project direction switched
- Lost one teammate ;(
- Problem space still the same

# Problem

→ XML is tedious to create

```
78 </module>
79 <module name="RegexpMultiline">
80   <property name="format" value="/\s*\W+\s* +\p{javaLowerCase}"/>
81   <property name="fileExtensions" value="java"/>
82   <property name="message"
83     value="First sentence in a comment should start with a
      capital letter"/>
84 </module>
85 <module name="RegexpSingleline">
86   <property name="format" value="/\s* +\p{javaLowerCase}"/>
87   <property name="fileExtensions" value="java"/>
88   <property name="message"
89     value="First sentence in a comment should start with a
      capital letter"/>
90 </module>
91 <module name="RegexpSingleline">
92   <property name="format" value="^(?!(*.http|import)).{101,}$"/>
93   <property name="fileExtensions" value="g, g4"/>
94   <property name="message" value="Line should not be longer then 100
      symbols"/>
95 </module>
96 <module name="RegexpSingleline">
97   <property name="format" value="^(?!(*.href=&quot;;|.http)).{101,}$"/>
98   <property name="fileExtensions" value="xml, vm"/>
99   <property name="message" value="Line should not be longer then 100
      symbols"/>

```

# Solution

- Show Configuration with GUI
- Edit with GUI
- Create with GUI

# New Goals

- PR to Original repo
- Publish to IntelliJ Marketplace

# Demo

# Architecture
